PROFESSIONAL SUMMARY

An Aspirant Data Scientist with a strong foundation in machine learning and programming, including Python and Java. Skilled in data analysis and visualization using libraries such as NumPy, Pandas, and Matplotlib to extract meaningful insights from complex datasets. Experienced in building and implementing predictive models and data-driven solutions to solve real-world problems. Quick learner with a problem-solving mindset, capable of working across diverse frameworks and translating analytical results into actionable outcomes.

SKILLS

- Programming Languages : Python, Machine Learning , Java , SQL
- Frameworks : Spring framework , Hibernate , Django
- Libraries : Numpy , Pandas, Matplotlib
- Tools : Tableau , VS Code , PPowerBi , Anaconda Navigator

WORK EXPERIENCE

Alfido Tech

Oct 2025 - Nov 2025

Machine Learning Intern

- Applied machine learning algorithms such as regression, classification, and clustering on real-world datasets
- Developed, trained, and evaluated predictive models using Python
- Performed data preprocessing, cleaning, and feature engineering using Pandas and NumPy
- Visualized data trends and model performance using Matplotlib
- Built and implemented 3 machine learning projects involving data analysis, prediction, and visualization
- Utilized Python libraries such as Pandas, NumPy, and Matplotlib for data manipulation and exploratory analysis

Codsoft

Jun 2025 - July 2025

Java Developer Intern

- Developed and implemented Java-based applications as part of internship training
- Applied core Java concepts including object-oriented programming (OOP), control structures, and exception handling
- Tested and debugged applications to ensure accuracy and reliability
- Strengthened problem-solving and coding skills through hands-on project development

EDUCATION

JNTUA college of Engineering, pulivendula

2023 - 2027

Computer science and engineering

Sri vasavi Junior College For Girls

2021 - 2023

Board of Intermedaite Education

Sri Maharshi E.M High School

2021

Secondary Education

PROJECTS

GETFIT - Fitness Management center

2025

- Developed a full-stack fitness web application using React, PHP, Bootstrap, and XAMPP
- Designed and implemented a responsive user interface to display workout routines and health diet plans
- Built secure user authentication with login and registration functionality using OTP verification
- Enabled users to browse fitness content and book workout/training sessions through the platform
- Integrated front-end and back-end components to ensure smooth data flow and user experience
- Focused on usability, performance, and clean UI design

Diabetes prediction System

2025

- Developed a machine learning-based prediction system to assess the likelihood of diabetes based on user health parameters such as height, weight, BMI, and other medical inputs
- Implemented and trained machine learning algorithms to classify users based on risk levels (diabetic / non-diabetic / risk probability)
- Performed data preprocessing, feature selection, and model evaluation to improve prediction accuracy
- Built a recommendation module to suggest preventive dietary guidelines based on predicted health condition
- Utilized Python and ML libraries for data handling, model building, and analysis

CERTIFICATIONS

Deloitte - Data Analytics virtual Job Simulation

2025

- Completed Data Analytics Job Simulation program by Deloitte, gaining hands-on exposure to real-world data analytics tasks
- Worked on data interpretation, visualization, and business insight generation through simulated industry case studies
- Strengthened skills in data-driven decision-making, problem-solving, and analytical thinking

Tata - GenAI powered Data Analytics Job Simulation

2025

- Completed GenAI Powered Data Analytics Job Simulation program by Tata Group
- Gained hands-on exposure to data analytics workflows using AI-driven and generative AI tools
- Worked on real-world business scenarios involving data interpretation, insight generation, and decision support
- Developed skills in data analysis, visualization, and applying GenAI concepts to improve analytical efficiency
- Strengthened understanding of how AI can be integrated into modern data analytics pipelines

UC SAN Diego - Data Structures

2024

- Completed Data Structures course on Coursera Data Structures Course (University of California San Diego) offered by the University of California San Diego via Coursera
- Gained strong understanding of core data structures including arrays, stacks, queues, linked lists, trees, and graphs
- Developed problem-solving skills and improved algorithmic thinking through programming exercises and assignments
- Strengthened ability to design efficient solutions for computational problems
